

ARGUELLO PET HOSPITAL
Authorization and Consent for Anesthesia/Prophy

Owner's Name _____ Patient's Name _____ Date _____
Phone numbers where you can be reached today _____

Are there any other procedures you would like done while your pet is here today?

- Yes (If yes, what? _____)
 No

Is your pet acting normal?

- Yes
 No (Why not _____)

When did your pet last eat? _____

Has your pet been medicated today?

- Yes (If yes, what/when _____)
 No

Would you like a phone call with an estimate before the anticipated procedures?

- Yes
 No

I have already received an estimate for today's procedure and it was \$ _____ .

BLOOD WORK CONSENT

We recommend those pets undergoing anesthesia have basic blood work performed prior to the procedure.

1. In apparently healthy, young pets, we suggest a basic blood panel to check for anemia, diabetes, total red cell volume, electrolytes and kidney function. The cost is \$61.50.
2. In dogs and cats seven and older, giant dogs over five years of age and pets with medical/surgical problems, we recommend a more comprehensive preanesthetic blood panel to assess red and white cell count, platelet count, liver and kidney functions, electrolytes and blood sugar. The cost is \$91.

Please check one:

- Yes, I would like to do these tests on my pet before anesthesia
 No, I decline the recommended blood work

ANESTHESIA SUPPORT (IV CATHETER)

We recommend that all pets that will be anesthetized have an intravenous catheter and receive intravenous fluids during the anesthesia, dental/surgical procedure and recovery from the anesthesia. Having a catheter placed in a vein before the induction of anesthesia allows us to treat any unforeseen complications that may arise during the procedure, i.e., hypotension (low blood pressure), cardiac arrhythmias (irregular heart rate), unusual amount of pain, etc. The administration of fluids during the anesthesia/procedure hastens the recovery process and helps maintain normal blood pressure. The cost is \$39 (catheter) and \$43 (fluids).

Please check one:

- Yes, I would like a catheter and intravenous fluids administered.
 No, I decline the recommended catheter and fluids

PLEASE TURN OVER →

Note: The intravenous catheter and fluids are required for dogs and cats older than seven and giant breeds older than five and or any pet with a medical condition that warrants these extra care measures.

May we extract diseased teeth? Yes No If needed, may we x-ray the teeth? \$31. Yes No

If we feel it optimal for a veterinary dentist to manage your pet's dental disease, would you Like a referral? Yes No

After the prophy is completed, would you like us to apply a 'plastic' coating to your pet's teeth to aid in the prevention of tartar accumulation? This is a product that we would apply and then you would apply weekly thereafter. This product would be effective only if used in conjunction with teeth brushing at home. The cost of Oravet is \$11.50-23.00. Take Home Kits are \$24.00. **Yes No**

Have the risks of anesthesia been explained to you? Yes No

Do you understand the risks? Yes No

Do you want the doctor to call you before the procedure begins? Yes No

MICROCHIP

Would you like to have a **MICROCHIP** inserted under the skin, between the shoulders, for permanent identification? The cost is \$65 for the microchip **and registration**. If your pet is lost, your pet could be identified with the microchip and easily be returned to you.

- Yes
- No

POST-EXTRACTION LASER TREATMENT

Post extraction laser treatment is a new service at Arguello Pet Hospital. After the gingiva/gums are sutured, a laser (high frequency light) therapy unit is used to treat the incision. It has been shown to reduce post-extraction inflammation, hasten healing and reduce extraction pain. The cost is \$15.

- Yes
- No

I am the owner, responsible agent for, or authorized agent of this pet. I understand the nature of the procedure(s), that there are risks involved with anesthesia, surgery/procedure and or dental prophylaxis. I understand that sedation and/or general anesthesia may be necessary to perform the scheduled procedures and to insure the safety of pets and employees. I authorize the veterinarians and the staff of Arguello Pet Hospital to perform all procedures as set forth above, including anesthesia, surgery, dental prophylaxis, medical services, treatments, laboratory tests, x-rays and medications. Further, in case of an emergency, I consent to any procedure deemed necessary and desirable in the attending veterinarian's professional judgment in order to address the unforeseen emergency. I understand that an attendant is not on the hospital premises 24 hours per day.

I AGREE TO PAY IN FULL FOR ALL SERVICES PERFORMED, INCLUDING THOSE DEEMED NECESSARY FOR MEDICAL OR SURGICAL COMPLICATIONS AND/OR UNFORESEEN CIRCUMSTANCES.
